Company profile
2021

- Founded in 2017, DDL Medikal is a Turkish company active in manufacture, marketing and distribution of medical devices, equipments and modern technologies for human health
- DDL Medikal provides innovative health solutions and delivers reliable quality and support to costumers.
- With our professional team with more than 10 years of field experience, we operate in huge, growing and demanding market such as Turkey and its region, ready to supply costumers from Europe to Middle East and further.

About US

DDL Medikal İlaç LTD. ŞTİ.

The production facility has been designed in accordance with HACCP rules. In production and packaging departments, production and packaging lines with flexible capacity and high speed are used.

Solid Production

- Tablet
- Effervescent tablet
- Chassis

Production is carried out with closed circuit, HACCP regulations with the latest technology equipment. Production capacity is 10,000,000 tablets / month in a single shift.

Liquid Production

- Syrup
- Suspension
- Spray
- Drop

Our Production Facility

DDL Medikal İlaç LTD. ŞTİ.

The productions are carried out in automated controlled tanks that are operated in a closed way without manual intervention. Active and auxiliary substances are transferred to these tanks by vacuum system. Production capacity is 300,000 bottles / month in a single shift.

Contract Manufacturing

In our facility, where closed system production is made with the latest technology equipment and designed in accordance with ISO 22000 Food Safety Management System (HACCP), production is carried out in a horizontal production concept that provides optimum working flexibility with a zoned and efficiency-oriented design.

DDL, with its flexible and high production capacity, provides timely, accurate and quality product service to contract manufacturers.
